

HealthPathways in Action

HealthPathways empowers clinicians with locally agreed information to make the right decisions, together with patients, at the point of care.

From this single website, GPs can identify the most effective treatment and management options using locally developed clinical guidelines, and quickly determine the relevant local specialists and services for their patients from an up-to-date service directory.

HealthPathways is designed and written for use during a consultation. Each pathway provides clear and concise guidance for assessing and managing a patient with a particular symptom or condition. Pathways also include information about making requests to services in the local health system.

Learning Outcomes:

- Know what HealthPathways is: its purpose and use; its difference from formal guidelines and its layout and functionality.
- Identify how patients with a particular condition will be managed in the local context inclusive of appropriate localised referral pathways
- Learn how to access it and incorporate it into patient consultations.
- Provide feedback on a particular pathway.

Speakers

Dr Hany Gayed, GP and Clinical Editor, HealthPathways Nepean Blue Mountains

Nick Rosser, HealthPathways Manager, Nepean Blue Mountains PHN

SESSION
12.30pm Register & light lunch
